Greenfield pulp mill

Showcase

OKI Pulp & Paper Mills, Indonesia

Highlight

The world’s largest High Energy Recovery Boiler.

Woodyard with nine new debarking lines including horizontally fed HHQ-XL Chippers.

Start-up: 2016

- Boiler capacity: 11,600 tons of dry solids per day
- The total capacity of the HERB is about 50% higher than of any other recovery boiler in operation today worldwide. The maximum daily green electricity production of the boiler is equivalent to the average daily electricity power need of a European city of one million inhabitants.
